

Industrial sewing technology

The ideal industrial sewing machine is selected for each sewing application, irrespective of manufacturer, and is then customized and delivered worldwide. The company works with well-known manufacturers, such as Kansai, Brother, Yamato, Juki, UnionSpecial, Dürkopp Adler, Pegasus, Pfaff, Megasew, and many others. This allows us to produce cost-conscious, high quality, and innovative solutions that enable our customers to „Sew perfectly – automatically.”

Examples:

- Modifiable four-needle interlock sewing machine in collaboration with Kansai Special for the consistent stitching of elastic waistbands, lace borders, and grip tops on medical compression stockings
