

Grand Prix of the middle class

02/18/2013 9:00

We were nominated for the nationwide competition „Grand Prix of the middle class” of the Oskar-Patzelt-Foundation and see this as a very special appreciation for our innovation in the field of sewing and automation technology.

Through our wide range of products we can offer our customers solutions in all areas of Spezialnähtechnik and automation of sewing and assembly processes, as well as individual Verpackungs-/Kennzeichnungslösungen and special machines.

We will of course continue to keep you posted on the further development of our nomination.
